

Studytok

Part-time Product Engineer

Build useful consumer products with AI coding tools

HOURS

20 hours per week

PAY

€20-25 per hour

PREFERRED DAYS

Thursday to Sunday

The preferred days give us the most time to work alongside you.

About Studytok

Studytok is a study app for Irish Junior and Leaving Cert students, available on web and mobile. We are a small team looking for someone who enjoys building useful consumer products and shaping how they work.

What you would do

- Help turn ideas and student needs into clear, usable features.
- Use Codex or Claude Code to build across mobile, web and backend.
- Work closely with us from early ideas through implementation, testing and release.

AI coding proficiency and technical judgement

Proficiency with Codex or Claude Code is central to this role. You should know how to break down a feature, give AI clear technical direction, evaluate its output, debug problems and verify that the result works.

You do not need to be fluent in Dart or TypeScript. Experience in other languages is welcome. What matters is understanding software systems, APIs, databases and deployment, being comfortable working with AWS, and using AI effectively to write the code.

Bring curiosity about consumer apps, product judgement and initiative. You would help shape features and have meaningful ownership from idea to release.

Our tech stack

Mobile	Flutter / Dart
Web	React / TypeScript
Backend	Node.js / TypeScript, Fastify, PostgreSQL and Redis on AWS

Useful extras: Cognito, Stripe / RevenueCat, AI integrations and GitHub Actions. Prior experience with every technology is not required.

Interested?

Send the following to careers@studytok.com :

- Your CV.
- A project you have built, with a link to the code or the live product.
- A short note on how you used AI coding tools to build it, and what you had to fix yourself.
- The hours and days you are available.

No cover letter needed.
